## Contents

<b><i>Preface</i></b>	<b>ix</b>
<b>Chapter 1. Introduction</b>	<b>1</b>
1.1 Elements of the Standard Model of Particle Physics	5
1.2 Leptons	7
1.3 Quarks	8
1.4 The Fundamental Interactions	17
Problems	20
For Further Reading	22
References	24
<b>Chapter 2. Lagrangian Formalism and Conservation Laws</b>	<b>27</b>
2.1 Hamilton's Principle	28
2.2 Free Field Theory Examples	30
2.3 Symmetries and Conservation Laws	32
Problems	35
For Further Reading	36
References	38
<b>Chapter 3. The Idea of Gauge Invariance</b>	<b>39</b>
3.1 Historical Preliminaries	39
3.2 Gauge Invariance in Classical Electrodynamics	41
3.3 Phase Invariance in Quantum Mechanics	43
3.4 Significance of Potentials in Quantum Theory	45
3.5 Phase Invariance in Field Theory	47
3.6 Feynman Rules for Electromagnetism	50
Problems	52
For Further Reading	54
References	56
<b>Chapter 4. Non-Abelian Gauge Theories</b>	<b>57</b>
4.1 Motivation	57

4.2	Construction	58
4.3	Some Physical Consequences	63
4.4	Assessment	66
	Problems	66
	For Further Reading	69
	References	70
<b>Chapter 5. Hidden Symmetries</b>		<b>71</b>
5.1	The Idea of Spontaneously Broken Symmetries	72
5.2	Spontaneous Breaking of Continuous Symmetries	76
5.3	Spontaneous Breaking of a Gauge Symmetry	79
5.4	The Sigma Model	81
5.5	Spontaneous Breaking of a Non-Abelian Symmetry	86
5.6	Prospects	87
	Problems	88
	For Further Reading	91
	References	93
<b>Chapter 6. Electroweak Interactions of Leptons</b>		<b>95</b>
6.1	An Effective Lagrangian for the Weak Interactions	96
6.2	Intermediate Vector Bosons: A First Look	108
6.3	The Standard Electroweak Theory of Leptons	118
6.4	Neutral-Current Interactions among Leptons	132
6.5	The Higgs Boson: a First Look	143
6.6	The Higgs Boson, Asymptotic Behavior, and the 1-TeV Scale	149
6.7	Neutrino Mixing and Neutrino Mass	154
6.8	Renormalizability of the Theory	164
6.9	Interim assessment	168
	Problems	169
	For Further Reading	175
	References	180
<b>Chapter 7. Electroweak Interactions of Quarks</b>		<b>183</b>
7.1	The Standard Electroweak Theory: Preliminaries	184
7.2	Electroweak Gauge Bosons	191
7.3	Electron–Positron Annihilations	194
7.4	Deeply Inelastic Lepton–Hadron Scattering	202
7.5	Hadron–Hadron Interactions	220
7.6	Further Tests of the Electroweak Theory	227
7.7	A Brief Look at Quantum Corrections	230
7.8	The Scale of Fermion Masses	234
7.9	Search for the Higgs Boson	237
7.10	Incompleteness of the Electroweak Theory	241

CONTENTS	vii
7.11 The Hierarchy Problem	244
7.12 The Vacuum Energy Problem	246
7.13 Reflections	247
Problems	249
For Further Reading	258
References	262
<b>Chapter 8. Strong Interactions among Quarks</b>	<b>267</b>
8.1 A Color Gauge Theory	268
8.2 Charge Renormalization in Electrodynamics	279
8.3 The Running Coupling Constant in QCD	292
8.4 Perturbative QCD: A First Example	302
8.5 QCD Corrections to Deeply Inelastic Scattering	306
8.6 Jets in Hadron-Hadron Collisions	323
8.7 Two-Photon Processes and the Photon Structure Function	327
8.8 Color Confinement	334
8.9 QCD-induced Electroweak Symmetry Breaking	341
8.10 The $1/N$ Expansion	344
8.11 Strong-Interaction Symmetries	351
8.12 Assessment	355
Problems	358
For Further Reading	369
References	377
<b>Chapter 9. Unified Theories</b>	<b>383</b>
9.1 Why Unify?	386
9.2 The SU(5) Model	388
9.3 Coupling Constant Unification	398
9.4 Nucleon Decay	404
9.5 The Baryon Number of the Universe	406
9.6 The Problem of Fermion Masses	410
9.7 An Assessment	412
Problems	414
For Further Reading	420
References	423
<b>Epilogue</b>	<b>425</b>
<b>Appendix A. Notations and Conventions</b>	<b>429</b>
A.1 Four-Vectors and Scalar Product	429
A.2 Dirac Matrices	430
A.3 Trace Theorems and Tensor Contractions	432
A.4 Dirac Equation and Dirac Spinors	433
A.5 Color Algebra	435

A.6	Weyl–van der Waerden Spinors	439
	References	439
<b>Appendix B. Observables and Feynman Rules</b>		<b>441</b>
B.1	Phase-Space Formulas: Decay Rates and Cross Sections	441
B.2	Feynman Rules: Generalities	442
B.3	Feynman Integrals	444
B.4	Regularization Procedures	446
B.5	Feynman Rules: Electrodynamics	447
	For Further Reading	448
	References	449
<b>Appendix C. Physical Constants</b>		<b>451</b>
	For Further Reading	451
<b>Author Index</b>		<b>453</b>
<b>Subject Index</b>		<b>473</b>
